By SCHELL.

During installation,
DIN EN1717
*(protection of drinking water
against contamination)*
has to be observed!

SCHELL Draw-off tap BIBCOCK.

Two extraction possibilities in one fitting for maximum convenience.

The SCHELL draw-off valve BIBCOCK offers not only smooth-running water extraction via COMFORT handle, as well as the practical possibility of connecting a bidet spray for hygienic cleaning. Ensuring maximum convenience.

Product description:

- Combined draw-off tap
- With COMFORT handle, grease chamber and flow regulator
- With ceramic isolating valve for hose connection
- Rosette \varnothing 57 mm, height 8 mm
- Out of brass, conform German drinking water regulation
- Surface: chrome
- Dimensions: DN 15 G 1/2 ext. thread

Advantages:

- Two outlets in one fitting: space-saving and separately adjustable
- COMFORT handle and grease chamber head part for continuously smooth action
- Easy to clean surface
- Thanks to the ceramic isolating valve, the intensity of the water jet can be adjusted to individual requirements
- Isolating valve also makes it easy to replace a faulty connection hose at any time
- Flow regulator ensures the water jet is perfectly formed, avoiding splashes and sprays
