**SCHELL angle valve COMFORT PT with temperature sensor
By SCHELL.**

SCHELL angle valve COMFORT PT with temperature sensor

Temperature measurement directly in the angle valve.

Because of their quality, angle valves from SCHELL are used all over the world. The temperature sensor now equips this classic element for the future. It permanently measures the water temperature and forwards the information to the eSCHELL water management system.

Product description:

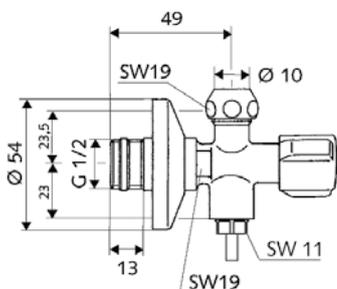

- PT 1000 Temperature sensor 1 m, 2 x 0.14 mm²
- Ø Temperature sensor 4 mm stainless steel 1.4404
- Operating temperature 0-150 °C
- Flow rate class A
- With self-sealing connecting thread (ASAG easy)
- COMFORT handle
- Long push rod, push-on rosette Ø 54 mm
- High tensile SCHELL brass cone compression connection with length compensation
- 4 plastic clips to fasten the sensor cable on the connecting hose of the tap
- Valve material: brass, conform to Drinking Water Regulation
- Finish: chrome
- Noise class: I

Advantages:

- Temperature sensor for connection to the eSCHELL water management system

SCHELL angle valve COMFORT PT with temperature sensor

Art. No: 04 992 06 99*
