

Factsheet. Sports facility.

Assumptions:

- Wash basin taps and shower fittings are always operated with mixed water (PWC and PWH).
- Hot water is heated with gas.
- Draw-off temperature at the wash basin is 35 °C.
- Draw-off temperature in the shower is 38 °C.

SCHELL products:

- contactless, electronic SCHELL wash basin taps in sanitary facilities
- electronic self-closing shower fittings from SCHELL in the shower cubicles

Basis of calculation:

- 200 patrons per day
- open on 350 days a year
- each patron uses a wash basin tap once
- every second patron also uses a shower fitting once

Other assumptions:

Bei WC und Urinal tragen die vorhandenen Armaturen nicht zum Wassersparen bei.

Our experts are on hand during all of your planning phases to discuss saving water with contactless SCHELL taps and fittings!
