SCHELL ASAG easy and ex worked thread.

Simple installation of angle valves and appliance connection fittings.

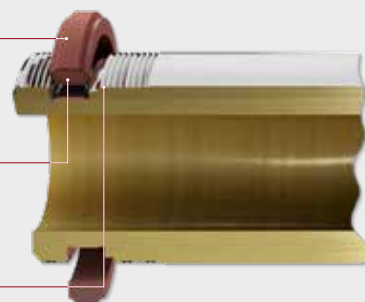

Thanks to ingenious solutions from SCHELL, the installation of angle valves, appliance connection fittings and wall-mounted flushing fittings has never been easier. No time-consuming roughening is required and the patented ASAG easy connecting thread even makes hemp or sealants unnecessary.

How ASAG easy works:

Patented sealing ring contour
for simpler insertion

Groove with beading to
improve grip for ASAG easy

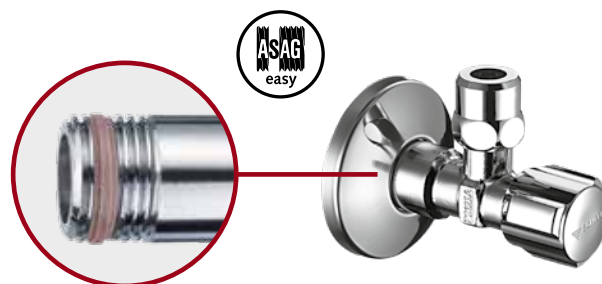

First thread lead is turned to ensure
simpler insertion into the wall disc

Hygienic installation with the patented ASAG easy.

ASAG easy, the self-sealing connecting thread from SCHELL, makes the installation of angle valves and appliance connection fittings even more convenient and hygienic while offering optimum seal quality.

- Quick attachment without additional materials
- Hygienic installation without hemp or other sealants
- Insertion is approx. 30% easier
- Subsequent adjustment of the fitting's vertical position possible at any time
- Simple replacement of fitting once inserted

Ex worked thread: just install – no roughening needed.

An end to the tedious roughening of connection threads. Ex worked thread from SCHELL makes your life easier on the construction site. For quick and easy conventional installation work.

- Simple attachment thanks to optimum level of roughness without manual roughening
- Secure application of the sealing cord or sealing tape
- Guarantees a professional threaded connection
- Suitable for virtually all non-self-sealing SCHELL angle valves, appliance connection fittings and wall-mounted flushing fittings
